EXPERIENCE

Thrive Social Services Society, Victoria, B.C. —
Adult, Child, and/or Youth Worker (Casual)

October 2022 - PRESENT

In this 1:1 position, I implement educational, recreational, social, and life skills-based programming, as per Individual Service Plan. This is a strengths-based approach that requires consistent communication and coordination with other team members to ensure optimal service.

Pacific Coast Community Resources, Victoria, B.C. — *Community Support Worker (Casual)*

November 2020 - PRESENT

I support residents in a group-home with activities of daily living, including but not limited to: toileting, showering, meal prep, documentation, and the use of slings with overhead lifts. Within this position, I strive to encourage independence while providing opportunities for community inclusion. My approach to care is strengths-based, while honouring choice and ensuring dignity is protected at all times. Medication is administered throughout the day as per physician directives. Activities are planned according to the needs and desires of the residents.

St. Vincent de Paul, Victoria, B.C. — *Housing Support Worker/Program Coordinator*

June 2021 - August 2022

Using a trauma-informed and harm-reduction approach, I supported single mothers and at-risk women residing in transitional housing. In this role, I provided emotional support while empowering women to start planning for their future. I remained apprised of community resources and provided referrals based on need. Within this organisation, I also worked collaboratively with my supervisor and colleague to create and implement programming for the residents at the St. Vincent de Paul Centre. At this location, I coordinated care with the residents and their Island Health teams, while providing crisis support as needed.

Kieronator Support Society (CLBC), Victoria, B.C. — *Personal Support Worker*

May 2018 - August 2022

I assisted a man living with cerebral palsy with activities of daily living. In this role, my focus was encouraging self-determination while providing meaningful opportunities for community inclusion, based on the strengths and interests of the individual. Care was provided in a home environment, through funding from Community Living British Columbia.
